

TIALN COATED

NIAGARA CUTTER™ SOLID END MILLING

GENERAL PURPOSE C430 SERIES

The Niagara C430 series end mills come equipped with four precision ground flutes that are capable of handling a variety of metal removal applications. Coupled with a TiAlN coating, these general purpose end mills outperform many traditional cutting tools. The C series is offered in a range that is best fit for any job shop environment. This single tool can replace the use of multiple tools for increased productivity, tool life and cost reduction. The C series of Niagara end mills also comes in a two and three flute option.
